

Solution Family Overview

Typical applications for ENTECH technology platforms.

	TST - Reservoir	TST - Wellbore	FlowTECH	HydroTECH	Flowline VRx	PetroPure™	X-Series	Sludge Slammer	Reclamation
Conventional oil well stimulation (Accelerated Production)	•	•	•	•			•		
Conventional oil well stimulation (Incremental Production)	•		•	•			•		
Waterflood. Increase oil cut & flow rate	•		•	•					
Conventional oil & gas downhole treatment (Paraffin & Asphaltene)	•	•	•						
Conventional oil & gas downhole treatment (Scaling)	•	•		•			•		
Cold heavy oil production with sand (CHOPS)	•		•	•			•		
Re-activate Wells & Loosen Formation (Pre-Fracture, regain permeability)	•		•	•			•		
Chemical Pipeline Cleaning - Offshore (perforations, pipeline)			•		•				
Accelerate Pipeline flow			•	•	•				
Pipeline treatment and cleaning			•	•	•		•		
Oil Sands extraction (in-situ)			•	•			•		
Oil Shale extraction			•	•			•		
Water Treatment & Management				•			•		•
Hydrocarbon separation						•			
Lower crude viscosity	•		•		•	•		•	
Sludgepit hydrocarbon reclamation							•	•	•
H2S control in reservoir	•						•		
Downhole metal pipe conditioning		•					•		
Metal conditioning (processing equipment)							•		
Storage Tank cleaning								•	
Truck / Rail / Tanker cleaning								•	
Exchanger cleaning			•	•					
Soil and Water reclamation							•		•
